## Timetable of the Research Plan on the Project:
"Intelligent Image Features Extraction in Knowledge Discovery Systems"

<table>
<thead>
<tr>
<th>Year</th>
<th>Activities</th>
</tr>
</thead>
</table>
| 1    | WEB-SITE SETUP  
  State-of-the-art investigation and implementation of the experimental system, targeting domain specific problems to be solved (with domain experts) |
| 2    | MID-TERM SEMINAR  
  Design of analysis tools for addressed applications  
  Development and implementation of new techniques in pixel and compressed domain |
| 3    | Integration of new feature extraction techniques into existing data mining and knowledge discovery systems  
  Interdisciplinary work and intensive cooperation with domain experts |
| 4    | FINAL SEMINAR  
  Building prototype-like implementation of a new feature extraction system  
  Detailed testing and validation of the results |
| 5    | |
